- 4) Application Programming : asp.net
- 5) Web services : web server through static IP
- 6) Hardware : server ,Lan Switch.
- 7) Communication setup : Broad Band connectivity ,
- 8) Implementation Office: Collector Office Jalgaon ( Maharashtra)
- 9) Objective of the Project : To provide the Govt. Resolution of all section of Collectorate
- 10) Date of Launch of Project: 1<sup>st</sup> August 2008
- 11) Coverage (Geographical) : Entire district.
- 12) Beneficiary of the project : All employee of Revenue & citizens of Jalgaon District ( )

### **B. Situation before the initiative :**

- All the employee or citizen did not know the latest Govt.Resolution in which the different order or guidance activity of Govt.
- The employee had to search the Govt. Resolution in S.O file of the branch. which is too old and the pages are damaged.
- While the clerk putup the file he had to mention the GR No.and date inwhich the guidance or rule of Govt.is defined but the GR of other dept he can't get to mention so the file get late coz of GR.
- All the Govt.Resolution of all dept. of collectorate is not available in one place. If required the employee had to search it at the different dept of collectorate.
- If the concern clerk or officer is not present at the office the employee or citizen did not get GR

### **C. Strategy Adopted:**

- We have introduced the E-library project to provide information about Govt. resolution to Collectorate in which all branches of Collectorate are included.
- The implementation of project is useful for all Collectorate employee to watch quick branchwise list of Govt. Resolution and make easy to fast work.
- The branchwise list Govt. Resolution was prepared according to the common need of employee in Collectorate.
- The details of Govt. Resolution has been finalized in such a way that hard copy also get from E-library if any technical problem have been created.
- In E-library near about 12600 Govt. Resolution have been created for making easy daily work.
- The E-library project has been designed by considering employee focus to solve daily problem about GR in the collectorate.
- In this project employee get quick result about GR by searching it date and subjectwise.
- The main strategy of the project is that the employee get information about GR and make easy to put forward the file and all system make fast.
- The web interface has been designed for the employee to handle and monitor the system.
- The Downloading of the G.R was done from website.

### Inauguration by Collector Jalgaon

- Collection all GR which are not available on web were get Scanned
- The files were convert into in PDF format
- Proper indexing of dept was done
- .Hard copy was printed for library.
